

Saviynt IGA Level 100 Training

Training Datasheet

Authored by: Saviynt University

Learning Path Overview

Saviynt IGA L100 training focuses on the core concepts of the Saviynt IGA solutions. This learning path provides a good preview of all the important IGA features and capabilities that Saviynt offers. After attending this training, the learners will obtain the knowledge and skills required to configure various features, navigate the user interface, understand the common use cases, and perform administrative tasks against your identity infrastructure. This training is built on the latest version of the Saviynt Identity Cloud.

Learning Path Duration

- 24 hours of learning content
- 20% lecture, 20% demo, and 60% hands-on lab

Target Audience

- IDM Consultants
- IDM Managers

Delivery Methods

- Classroom (In-person)
- Virtual Classroom (Live-Online)
- Onsite
- Self-Paced

Lab Environment

- Hands-on labs are included as part of this training

Prerequisites

- This training has no prerequisites.

Learning Path Objectives

This learning path enables you to achieve the following objectives:

- Learn about the Control Centre.
- Understand the basic concepts related to SOD.
- Understand the different Saviynt integrations with ServiceNow.
- Understand Saviynt APIs.
- Learn about various best practices and troubleshooting scenarios.

Courses and Modules

01 | Saviynt Overview and Course Introduction

- About Saviynt
- Saviynt's Product Offerings
- IGA Level 100 Training

02 | Getting Started

- Introduction to IGA
- Saviynt Identity Cloud Architecture
- Concepts and Terminologies
- Types of Applications
- Application Operations
- Saviynt Tasks Overview
- Saviynt Identity Cloud Authentication and Authorization
- Walkthrough of Saviynt Identity Cloud
- Database and Data Analyzer

03 | Identity Cloud Building Blocks

- SSO Implementation
- SSO Implementation - Okta
- SAV Roles Introduction
- Custom SAV Roles
- Methods to Add SAV Roles
- Saviynt Identity Cloud UI Customization
- Saviynt Identity Cloud Certificate Management
- Best Practices and Troubleshooting

04 | Building Identity Warehouse

- User Import
- Create a User from Saviynt UI
- User Import for Connected Applications
- Application Onboarding
- Application Data Import
- Application Onboarding and Management
- Application Onboarding Scenarios
- Best Practices and Troubleshooting

05 | Access Request System

- Access Request System Overview
- Access Request Features
- Types of Access Requests
- Approval Logic - Management and Configuration
- Email Notifications and Templates
- Setup SMTP for Email Notifications
- Setting up Access Request for Applications
- Access Request Use Cases
- Onboarding Users using Access Requests
- Best Practices and Troubleshooting

06 | Rules and Policies

- Policies
- Technical Rules
- Setting up Technical Rules
- User Update Rules
- Setting up User Update Rules
- Common Use Cases
- Best Practices and Troubleshooting

07 | **Certifications**

- Certifications Overview
- Campaign Lifecycle
- User Manager Access Review - Features and Configuration
- Entitlement Owner Access Review - Features and Configuration
- Role Owner Access Review – Features and Configuration
- Application Owner Access Review- Features and Configuration
- Miscellaneous Features
- Best Practices and Troubleshooting

09 | **Miscellaneous**

- Saviynt Exchange Overview
- Introduction to SOD
- Saviynt Integration with ServiceNow
- Saviynt APIs

08 | **Saviynt Identity Cloud Intelligence and Control Centre**

- Intelligence Overview
- Data Analyzer
- Types of Analytics
- Common Use Cases
- Control Centre Overview
- Best Practices and Troubleshooting

Upon Training Completion

Saviynt will provide you with a course completion certificate after completing this training course. A sample of the certificate is shown below:
