

Datasheet - Saviynt JITA Fundamentals Training

Training Datasheet

Authored by: Saviynt University

Learning Path Overview

Saviynt Just-in-Time Access (JITA) Fundamentals learning path offers a comprehensive introduction to JITA in Identity Governance. Designed for professionals seeking to strengthen security and optimize access control, this training covers JITA's key features, benefits, components, and workflow phases. You will gain valuable insights into the roles and responsibilities of administrators, application owners, and end users, along with strategies to identify and remediate static access risks using JITA's discovery capabilities. In this learning path, you will acquire the necessary skills to configure time-bound privileged access policies, manage emergency roles and shared account access, analyze activity through usage reports, implement password rotation, enable multi-factor authentication (MFA), and customize Analytical Control. This training is built on the latest version of the Saviynt Identity Cloud.

Learning Path Duration

- 2 hours of learning content
- 60% lecture and 40% demo

Target Audience

- Consultants/Architects/Experts
- Managers/Administrators
- Application Owners

Delivery Methods

- Self-Paced

Lab Environment

- e-Learning content only

Prerequisites

- Saviynt IGA Level 100 training or equivalent knowledge and administration experience with the Saviynt platform

Learning Path Objectives

This learning path enables you to achieve the following objectives:

- Describe the fundamental features and benefits of Just-In-Time Access (JITA) in identity governance.
- Identify the components and the different workflow phases of JITA.
- Explore the roles and responsibilities of different personas interacting with JITA (Administrators, Application Owners, and Users).
- Discover and remediate static access risks using JITA's discovery features.
- Configure access policies to enable secure, time-bound privileged access.
- Create and manage JITA requests for emergency roles and shared accounts.
- Analyze usage reports to gain insights into JITA activities.
- Set up periodic password rotation and multi-factor authentication (MFA) settings.
- Explore the ways to customize Analytical Control.

Courses and Modules

01 | Introduction to JITA

- JITA Introduction
- Features and Benefits of JITA
- Application Coverage

02 | JITA Workflows and Access Controls

- JITA Components
- JITA Workflows
- JITA Discovery
- JITA Remediation
- Access Control for Shared Accounts
- Access Control for Emergency Roles

03 | Customization and Admin Config

- Periodic Password Rotation
- MFA Authentication Settings
- Customizing the Analytical Control

04 | JITA Usage and Reporting

- End-User Request for Shared Accounts
- End-User Request for Emergency Roles
- Analyzing Usage Reports

Upon Training Completion

Saviynt will provide you with a training completion certificate after completion of this training. A sample of the certificate is shown below:
