

# Saviynt PAM Level 100 Training

## Training Datasheet

Authored by: Saviynt University

## Learning Path Overview

The Saviynt PAM L100 learning path introduces the foundational concepts, features, and capabilities of Saviynt Privileged Access Management (PAM). Designed for PAM Implementation Specialists, Solution Architects, and Consultants, this training provides a structured overview of the platform and its role in securing and governing privileged access across enterprise environments.

Learners will explore the Saviynt user interface, understand core PAM functionalities, and gain hands-on experience performing common administrative and operational tasks. The course also introduces key privileged access use cases, enabling participants to understand how PAM controls are implemented to protect critical systems, manage privileged credentials, and enforce governance policies.

Built on the latest version of the Saviynt Identity Cloud, this training equips implementation and consulting professionals with the foundational knowledge needed to design, deploy, and support Saviynt PAM solutions in real-world environments.

### **Learning Path Duration**

- 24 hours of learning content
- 30% lecture, 30% demo, and 40% hands-on lab

### **Target Audience**

- Saviynt PAM Implementation Teams
- PAM Consultants
- PAM Solution Architects

### **Delivery Methods**

- Classroom (In-Person)
- Virtual Classroom (Live-Online)
- Onsite
- Self-Paced

### **Lab Environment**

- Hands-on labs are included as part of this training

### **Prerequisites**

- This training has no prerequisites.

# Learning Path Objectives

This learning path enables you to achieve the following objectives:

- Learn the core concepts and features of Privileged Access Management (PAM).
- Explore the architecture of Saviynt and gain a high-level understanding of PAM Architecture.
- Understand various connectivity options, including Saviynt Connect 2.0.
- Discover the supported feature matrix of Saviynt PAM.
- Gain insights into Global Configurations for PAM.
- Learn about the PAM-specific SAV roles and associated workflows.
- Understand how to create and manage Email Templates for PAM.
- Explore different PAM Methods, such as Privileged Role Elevation, Check Out Credential, Connect To Session, and Just-In-Time.
- Learn the process of setting up a Vault connection.
- Prepare target workloads for PAM integration.
- Understand Master Connections and learn how to create them for various workloads.
- Explain the creation of various connections, such as Active Directory, AWS, GCP, On-Premises, etc.
- Learn the bootstrapping process and its relevance in PAM.
- Understand the discovery and bootstrapping process for Active Directory, On-Premises, and Cloud targets.
- Learn about PAM-related KPIs and Controls.
- Learn about Active Directory (AD) Bridging.

- Explain the process of creating Endpoint Policies for PAM.
- Understand Periodic Password Rotation and Password Reconciliation jobs.
- Learn how to request and launch sessions for Check Out Credential, Connect To Session, Remote Apps, Generic Vault, and AAPM.
- Understand how MFA is configured for Privileged Access.
- Learn how PAM sessions are managed and monitored.

# Courses and Modules

## 01 | Saviynt PAM Overview

- Saviynt Identity Cloud
- Saviynt PAM Highlights
- Saviynt Solutions to PAM Challenges

## 03 | Saviynt PAM Support Matrix

- Key Features of Saviynt PAM
- Feature Support Matrix

## 05 | Saviynt PAM Access Methods

- Privileged Role Elevation
- Check Out Credential
- Connect To Session
- Just-In-Time

## 02 | Architecting PAM with Saviynt

- 
- Saviynt Architecture
- Architecture of Saviynt PAM
- Saviynt Connect 2.0
- 

## 04 | Configurations for Saviynt PAM

- Global Configurations - PAM
- Task Execution Hierarchy
- Auto and Instant Provisioning
- PAM SAV Roles
- Workflows
- Email Templates for PAM
- Application Logs
- Best Practices and Troubleshooting

## 06 | Setting up Saviynt PAM

- Working with Hashicorp Vault
- Vault Connection
- Preparing Target Workloads for PAM
- Master Connections
- Active Directory Connection Creation
- AWS Connection Creation
- GCP Connection Creation
- On-Premises Connection Creation
- Security System and Endpoint Creation
- Import Accounts and Access
- AWS Emergency Roles
- Best Practices and Troubleshooting

## **07 | Manage Accounts and Workloads**

- Onboarding Targets
- Bootstrapping
- Checklist for PAM Setup
- Discovery and Bootstrapping of Cloud Workloads
- Discovery and Bootstrapping of Active Directory
- Discovery and Bootstrapping of On-Premises workloads
- Endpoint Policy creation
- Password Management
- PAM KPIs and Controls
- Best Practices and Troubleshooting

## **08 | Privileged Access**

- Assets and Sessions Page
- Connect to Session
- Check Out Credential
- Break Glass
- Generic Vault
- Application-to-Application Password Management
- Remote Apps
- MFA for Privileged Access
- AD Bridging
- Best Practices and Troubleshooting

## **09 | Monitor Privileged Session**

- Manage PAM Sessions
- Recorded and Live Sessions
- Restricted and Risky Commands
- Session Actions
- Best Practices and Troubleshooting

## Upon Training Completion

Saviynt will provide you with a training completion certificate after completion of this training. A sample of the certificate is shown below:
