

Saviynt IGA for End Users Training

Training Datasheet

Authored by: Saviynt University

Learning Path Overview

Saviynt IGA for End Users learning path provides a practical introduction to Saviynt Identity Cloud, focusing on how to manage access effectively in your daily role. You'll gain hands-on experience with core features such as Access Requests, Access Reviews, and Analytics Reports. By the end of this learning path, you'll be able to manage access efficiently and support your organization's security and compliance goals. This training is built on the latest version of the Saviynt Identity Cloud.

Learning Path Duration

- 2 hours and 20 minutes of learning content
- 60% lecture and 40% demo

Target Audience

- Application requestor and approver
- Any end user of the product

Delivery Methods

- Self-Paced

Lab Environment

- e-Learning content only

Prerequisites

- This training has no prerequisites.

Learning Path Objectives

This learning path enables you to achieve the following objectives:

- Describe the core components of Saviynt's Identity Cloud and its role in identity governance.
- Understand the use of Access Request System module to submit, modify, and track application and role-based access requests.
- Evaluate and process access requests based on role, entitlement, and Segregation of Duties (SOD) policies.
- Execute password reset and delegation tasks for user account management.
- Identify and respond to SOD-related access requests and approvals.
- Interpret and perform Access Reviews across various user roles, including User Manager, Entitlement Owner, Role Owner, and Application Owner.
- Analyze analytics and runtime reports to support identity and access decisions.
