Saviynt

Saviynt Identity Solutions for Higher Education

Enable and Secure New Digital Learning Experiences

Institutional resilience is top of mind for higher education leaders as they prepare for a tomorrow's reality of anomaly as the new normal. Today's imperatives include developing cybersecurity as a core competency, intelligence-driven decision-making and enabling people to do their best work regardless of the circumstances.

Intelligent, secure identity management is central to these efforts. Saviynt's Identity Cloud gives educational institutions unparalleled visibility, control, and intelligence to better defend against threats and empower users with right-time, right-level access to the digital tools and technologies they need to do their best work.

Saviynt's # 1 converged identity platform combines identity, privileged access, third party access, applications, and data access governance into a single cohesive platform. Simplify staff and student access to digital learning tools and experiences, secure sensitive data and stay compliant.

We help higher education institutions:

- Facilitate and control digital access for complex student, staff, and alumni populations – including 'One Identity for Life'

- Modernize IT infrastructure and accelerate cloud adoption

- Maintain an "always-ready" compliance posture

Achieve one identity for life

Compared to commercial enterprises, higher education institutions have some of the most complex identity governance challenges. One individual could have overlapping simultaneous roles, such as student, teaching assistant, teacher, research assistant and eventually transition to an alumni identity.

Often these identities originate from different systems, which make identity lifecycle management even more challenging.

With Saviynt you get granular visibility and management of identities and their access across cloud, hybrid, and on-premises environments. Powered by a comprehensive identity warehouse and extensive controls, such as duplicate identity management teams are able to contextually attach multiple personas and customized access permissions to a single identity. Support complex scenarios like student-staff personas and students accessing alumni networks.

Tame identity complexity

Eliminate legacy costs, simplify compliance and unleash user productivity with the #1 converged identity platform, built to deliver value from day-one. If moving to a cloud-hosted converged identity platform is on your agenda, take note: not all cloud identity solutions are created alike. Saviynt's #1 converged identity platform provides comprehensive identity security capabilities on a singular, FedRAMP-grade, cloud native architecture.

Protect student and faculty data, and intellectual property

Simplify management with automation, AI/ML and RPA

Accelerate One Identity for Life adoption

Achieve an always-ready compliance posture

Simplify Compliance

University leaders must be able to demonstrate effective security controls are being used and that the institution is complying with a myriad of regulations. Our built-in control center unifies identity administration across environments, bringing together intelligence, reporting, and dashboarding to enable continuous compliance. Understand your program's overall health with complete visibility and key performance indicators for human and silicon identities, compliance, service health, and configurations in a single pane of glass.

Transform user experience

Empower your people – students, faculty, researchers, healthcare workers – from day one, wherever and whenever they work or learn. Start your lifelong relationships on the right foot, with a seamless onboarding experience that makes it easy to get the right access at the right time, while removing the burden off your help desk and IAM teams.

Designed for rapid deployment.
Configure without code and use templates to deploy in weeks.

Built on Zero Trust.
Automate just-in-time privilege elevation and time bound access for human and machine identitites.

Continuous compliance ready.
Simplify audits with an assured compliance framework.
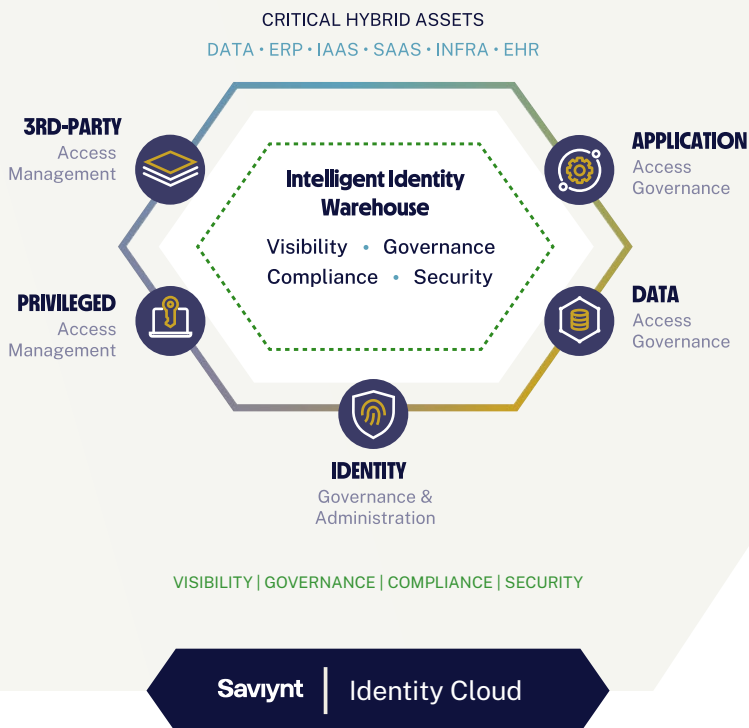

Trusted and secure.
Meet evolving security and industry regulations with a SOC, ISO and FedRAMP Moderate certified identity platform.
