Learning Methods

A variety of learning methods offer flexibility as you grow your Saviynt skills

Instructor-led Learn directly from the experienced Saviynt Certified instructors. Delivered both virtually and in person, these highly interactive courses are a great way to accelerate your Saviynt skills through discussions and access to hands-on environments.

On-demand View digital learning subscription solutions, accessible 24/7, for individual users and IT teams. This self-paced training is identical to classroom instruction and accessed through Saviynt Learning Management System. Learners have access to recorded training modules, course materials, and practice labs via Saviynt Litmos Portal.

Dedicated Class Private training at your location is tailored to fit your time and delivery needs. The instructor focuses on your specific training needs and business goals. When training multiple team members, the cost per student is lower than the cost of a public class. We will help you define your requirements relative to your goals and set up private custom courses to meet your specific learning objectives.

Certification Exam Saviynt Certifications validate the critical skills required to integrate and manage Saviynt Solutions that drive our customer's desired business outcomes. Certifications are organized into multiple product areas with levels for those new to the industry as well as experts in the field.

The Value of Hands-On Training

The only set of training programs and offerings built by the experts at Saviynt

Put theory into practice with realistic product experience using dedicated sandbox environment. Hands-on learning encourages critical thinking, and teaches troubleshooting approach using accessible resources

Retain Learning for longer time with the hands-on instruction approach. Lab infrastructure is provided for 7 days during instructor-led training and for 14 days during self-paced training.

Structured learning experience with a combination of theory and hands-on lab exercises wherein the learners follow step-by-step lab instructions to obtain desired learning objectives.

Social experience encourages learners to engage with the trainer and other attendees, thereby, creating a fun social atmosphere in the training.

“

“Very knowledgeable training session and doubts were cleared thoroughly.”

- IGA L100 Learner

“The training materials provided were amazing, they are simple, easy to follow, and practical tools for us to use in our work lives.”

- IGA L200 Learner

“A good introduction to the basics of Saviynt. The labs were good. I need to take the L200 course :-) Tinu did a great job!”

- IGA L200 Learner

“This training was very helpful in getting an insight into CPAM and providing us with the configuration basics, looking forward to L200 for CPAM to continue the journey towards learning CPAM.”

- CPAM L200 Learner

Validate your skills

Test what you know through examination.

The Saviynt Certification Program will contain a series of exams that allows you to:

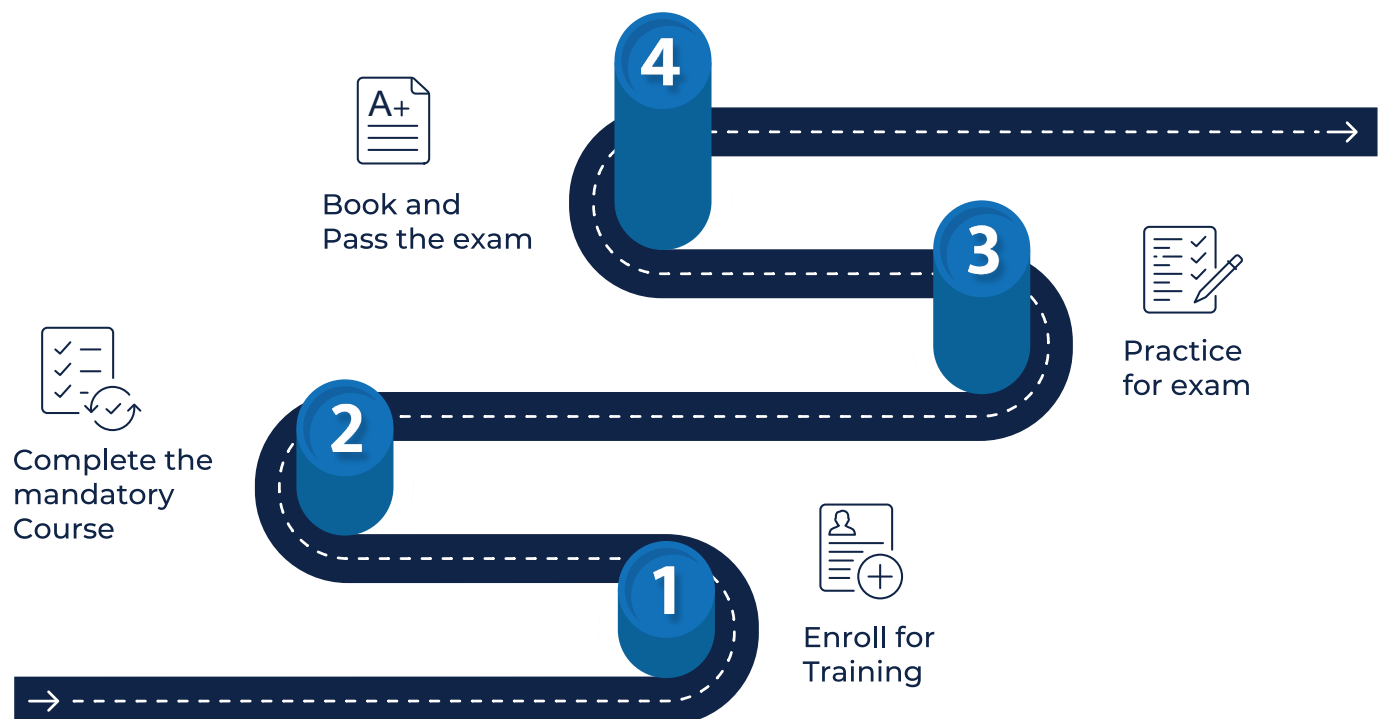

- Demonstrate your proficiency across Saviynt products and versions.
- Gain a competitive advantage by developing a skill set that's in demand, worldwide.
- Promote your personal brand in the global Saviynt community and marketplace.

It is the mission of the Saviynt Professional Certification Program to:

- Promote your personal brand in the global Saviynt community and marketplace.
- Develop a worldwide community of highly skilled certified professionals who recommend, sell, service, support and/or use Saviynt products and solutions.

Start your certification journey

Saviynt Certification Program-How to Certify?

Saviynt Certified IGA Professional

The Saviynt Certified IGA Professional (SAVIGA-C01) examination is intended for individuals who have the knowledge, skills and abilities to demonstrate basic understanding of the Saviynt Identity Governance and Administration (IGA) platform, including: available product features and common use cases.

The candidate will demonstrate an understanding of Saviynt IGA capabilities including: building identity warehouse, connected vs disconnected application onboarding, access request use-cases, access rules, segregation of duties, attestation, analytics, and value proposition of a Saviynt IGA solution.

SAVIGA-C01 certification validates candidate's ability to:

- Explain the value of Saviynt IGA offerings.
- Understand and explain Saviynt IGA deployment models.
- Understand the concepts of building an identity warehouse using Saviynt EIC.
- Understand user onboarding and offboarding procedures.
- Describe connected vs disconnected application onboarding.
- Describe common use cases for Access Request System (ARS).
- Describe common use cases for Segregation of duties (SoDs).
- Understand and explain Saviynt access Attestation capabilities.
- Understand and explain Saviynt Analytics and Reporting capabilities.

Minimally Qualified Candidate

We recommend that candidates have at least 6 months of hands-on experience with Saviynt IGA (SSM) platform in any role including IDM consultants, engineers, managers, decision makers, as well as those working in IDM sales, and pre-sales departments. The minimally qualified candidate (MQC) possesses skills in deploying, configuring, and managing Saviynt IGA solutions.

Exam Pre-requisite

It is mandatory to complete the Saviynt IGA Level 100 classroom or self-paced training before scheduling the exam.

Exam Duration

Saviynt Certified IGA Professional (SAVIGA-C01) examination contains 70 multiple choice questions and duration of the exam is 2 hours. Your results for the examination are reported as a score from 50–500, with a minimum passing score of 350.

Saviynt CPAM L100 Training

Saviynt CPAM L100 training focuses on covering the core concepts of the product. This course provides a good preview of all the important CPAM features and capabilities that Saviynt offers. After attending this training, the learner will obtain the knowledge and skills required to configure various features, navigate the user interface, understand the common use cases, and perform administrative tasks related to CPAM infrastructure. This course is built on Saviynt EIC v2023.x.

Course Duration

- Three (3) days of instructor-led classroom training
- 60% lecture, 40% hands-on lab

Delivery Methods

- Classroom (ILT) – Paid
- Self-paced – Paid

Target Audience

- PAM Consultants
- PAM Implementation team
- PAM PoC team
- PAM Product Management team
- PAM Support

Lab Environment

- The lab environment for the in-person and virtual classroom training will be available for 7 calendar days
- The lab environment for the Self-paced training will be available for 14 calendar days

Course Objectives

By the end of this course, you should be able to meet the following objectives:

- Understand the basics of CPAM architecture and features.
- Learn about the IGA concepts as pre-requisites for CPAM configurations.
- Explain how connections are set up and how PAM is configured for all Workloads.
- Learn about the various CPAM Methods, such as Credential-less, Credential, Just-In-Time, Role-based PAM for all Workloads.
- Learn about Workload onboarding for On-premises and Cloud.
- Explain how Accounts and Workloads are discovered.
- Understand the process of setting up a Vault connection.
- Learn about bootstrapping of Accounts and Workloads.
- Understand how PAM sessions are managed.
- Learn about the various KPIs and Controls related to PAM.
- Explain Password Management.

Saviynt Cloud Security Analyzer L100 Training

This hands-on, self-paced training course focuses on covering the core concepts of Saviynt Cloud Security Analyzer. The training provides a good preview of all the important features of Saviynt Cloud Security. The course talks about the major security and access related challenges faced in a multi cloud ecosystem and how Saviynt provides various capabilities pertaining to visibility, Compliance, Risk prevention and remediation using a single pane of glass view. This course provides you the knowledge and skills that is needed to configure various features, navigate the user interface, understand the common use cases, and perform administrative tasks against your security infrastructure.

Course Duration

- One Day worth of Course material
- 60% Video content, 40% hands-on lab

Delivery Methods

- Self-Paced – Paid

Target Audience

- Cloud Platform Owners
- Compliance Officers
- Cloud Security Officers

Lab Environment

- Lab environment will be available for 14 Days

Course Objectives

By the end of this course, you should be able to meet the following objectives:

- Learn about how Identity 3.0 can transform your enterprise.
- Navigate the SSM user interface.
- Understand the importance of Cloud Security.
- Understand the challenges of securing a Multi cloud Ecosystem.
- Understand Saviynt's strategy to address visibility, compliance and Prevention to secure IaaS.
- Connect various cloud platforms and applications to Saviynt.
- Configure import process for ongoing discovery of new cloud assets.
- Centralized dashboards to get insights into security posture of a cloud ecosystem.
- Leverage out of the box controls to detect and remediate risky assets.
- Build custom controls to address required Security requirements.
- Fine grained access visibility for Privileged and non-privileged resources.
- Identity violations for both local and Federated scenarios.
- Detect Identity violations for both Federated and non-Federated infrastructure.

Saviynt IGA L100 Training

Saviynt IGA L100 training focuses on covering the core concepts of the Saviynt IGA solution. This course provides a good preview of all the important IGA features and the capabilities that Saviynt offers. After attending this training, the learner will obtain the knowledge and skills required to configure various features, navigate the user interface, understand the common use cases, and perform administrative tasks against your identity infrastructure. This course is built on Saviynt EIC v2023.x.

Course Duration

- Three (3) days of instructor-led classroom training
- 40% lecture, 60% hands-on lab

Target Audience

- IDM Consultants
- IDM Managers

Delivery Methods

- Classroom (ILT) - Paid
- Self-paced (5 free IGA L100 self-paced seats included) - Paid thereafter

Lab Environment

- The lab environment for the virtual classroom training will be available for 7 calendar days
- The lab environment for the Self-Paced training will be available for 14 calendar days

Course Objectives

By the end of this course, you should be able to meet the following objectives:

- Understand how Saviynt EIC can transform your enterprise.
- Understand the navigation of the Saviynt EIC user interface.
- Learn about how to import user and application data to build an identity warehouse.
- Understand the difference between connected and disconnected applications.

What's New with [v2.0] Saviynt App for ServiceNow Training

This self-paced training course focuses on covering What's New with v2.0 Saviynt App for ServiceNow. The training provides a good preview of improvements made to the Saviynt App for ServiceNow user interface for seamless user experience. This course provides the knowledge and skills to learn the various features, navigate the user interface, understand the common use cases, and perform business user tasks against your Identity infrastructure. This course is built on v2.0 Saviynt App for ServiceNow.

Course Duration

- 1 hour of self-paced training
- 50% lecture and 50% demo

Delivery Methods

- Self-paced - Free

Target Audience

- IDM Consultants
- IDM Managers
- Any experienced individual (Saviynt Platform)

Course Objectives

By the end of this course, you should be able to meet the following objectives:

- Understand What's New with v2.0 Saviynt App for ServiceNow.
- Learn about the improvements to the v2.0 Saviynt App for ServiceNow that is relevant for End Users.
- Understand the improvements made to the user interface for seamless user experience.
- Explain the improvements related to the v2.0 Saviynt App for ServiceNow that is relevant for Admin Users.

Saviynt What's New with [v5.5 SP2] Training

This training course focuses on covering the new features and capabilities of the 5.5 SP2 release. This training course will be extremely helpful for the consultants, engineers and managers who are already well versed with the Saviynt platform and are looking to understand how the product has been enhanced with the 5.5 SP2 release.

Course Duration

- Three (3) days of self-paced training
- 100% videos

Delivery Methods

- Self-Paced – Free

Target Audience

- IDM Consultants
- IDM Managers
- Any experienced individual (Saviynt Platform)

Pricing

- Contact your Saviynt representative for pricing information.

Course Objectives

By the end of this course, you should be able to meet the following objectives:

- Understand the new features introduced in the 5.5 SP2 version.
- Understand the new features introduced in the 5.5 SP2 version.
- Be better prepared to make the environment upgrade decision.

Saviynt What's New with [v5.5 SP4] Training

This hands-on training course focuses on covering the core concepts of the product. The training provides a good preview of all the important IGA features and the capabilities that Saviynt offers. This course is built on Saviynt Security Manager (SSM) 5.5. This course provides you with the knowledge and skills to configure various features, navigate the user interface, understand the common use cases, and perform administrative tasks against your Identity infrastructure.

Course Duration

- Three (3) days of instructor-led classroom training
- 40% lecture, 60% hands-on lab]

Target Audience

- IDM Consultants
- IDM Managers

Delivery Methods

- Self-Paced - Free

Lab Environment

- ***The lab environment for the in-person and virtual classroom training will be available for 7 calendar days***
